

Virtual WBC type 26

lymphocytes + immature myeloid
lineage WBC/blasts (circled)

*More present in disease (vs. normal)
More present in MDS (vs. anaemia)*

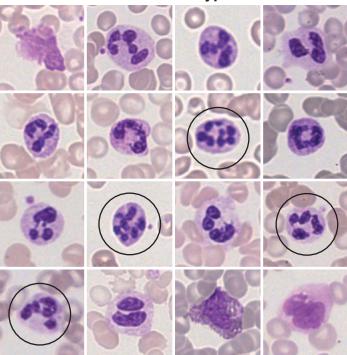

Virtual WBC type 47

regular lymphocytes

*More present in anaemia (vs. MDS)
More present in SF3B1 w.t. (vs. SF3B1-mutant)*

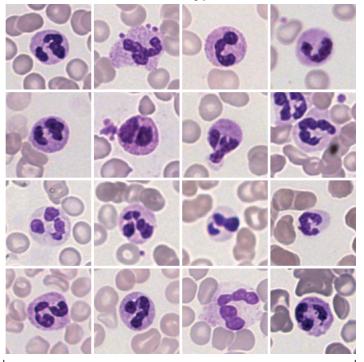

Virtual WBC type 1

large hyperlobulated neutrophils (circled)

*More present in normal (vs. disease)
More present in megaloblastic anaemia (vs. iron def.)*

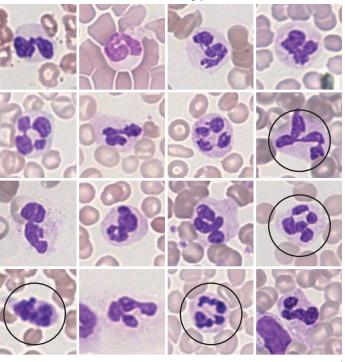

Virtual WBC type 22

normal neutrophils

*More present in normal (vs. disease)
More present in SF3B1-mutant (vs. SF3B1-w.t.)*

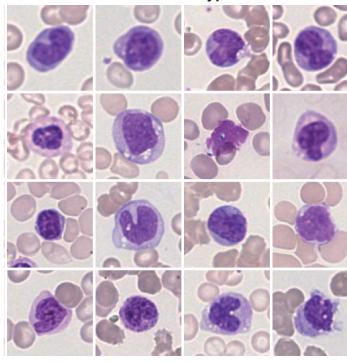

Virtual WBC type 10

hyperlobulated neutrophils (circled)

*More present in SF3B1-w.t. (vs. SF3B1-mutant)
More present in iron def. (vs. megaloblastic anaemia)*

Virtual WBC type 39

monocytes

More present in MDS (vs. anaemia)
